

# Sing for Climate – Final Clip

20/08/2019

Sing for the Climate is a big singing manifestation that first took place on September 22 and 23 2012 in Belgium. More than 80.000 people in more than 180 Belgian cities and communities sang the song “Do it Now”, urging politicians to take more ambitious climate measures both on local, national and international level. This video is a synthesis of recordings that were made in all locations. The success of ‘Sing for the Climate’ proves that a mass mobilization around climate change is still possible even after the COP15 in Copenhagen. But Belgium is a small country and climate change is global problem, which needs to be tackled on an international level. Therefore we appeal to local groups and organizations worldwide to organize their own version of Sing for the Climate. More information, tools and support for your local action can be found on <http://www.singfortheclimate.com> Sing for the Climate is the culmination of three years campaigning for ‘The Big Ask’.
